Dataset metadata

This dataset provides 2011 estimates that classify usual residents aged 16 to 74 in England and Wales by year last worked. The estimates are as at census day, 27 March 2011.

Information on economic activity status is used by central and local government, researchers and other organisations to understand local labour markets and to develop and monitor policies at local and regional levels. It is used to identify deprived areas, to allocate community and economic development funding, and for housing and transport planning purposes. The statistics produced show local labour markets and social patterns linked to employment and unemployment. When used with information on sex, age, ethnicity, health and disability, the statistics identify areas where a barrier to employment exists and allows the targeting of resources and policies to encourage people to work.

Statistical Disclosure Control

In order to protect against disclosure of personal information from the 2011 Census, there has been swapping of records in the Census database between different geographic areas, and so some counts will be affected. In the main, the greatest effects will be at the lowest geographies, since the record swapping is targeted towards those households with unusual characteristics in small areas.

More details on the ONS Census disclosure control strategy may be found on the [Statistical Disclosure Control](#) page on the ONS web site.

Variables

geography

The following types of geography are available:

NHS area teams, clinical commissioning groups, built-up areas including subdivisions, built-up areas, national assembly for wales electoral regions 2010, postcode areas, postcode districts, postcode sectors, national assembly for wales constituencies 2010, parishes 2011, 2011 local health boards, 2011 primary care trusts, 2011 strategic health authorities, 2011 wards, 2011 super output areas - middle layer, 2011 super output areas - lower layer, 2011 output areas, local enterprise partnerships (as of April 2017), parliamentary constituencies 2010, former metropolitan counties, local authorities: county / unitary (prior to April 2015), local authorities: district / unitary (prior to April 2015), regions, countries

Rural Urban

This classification can only be used with the following geographies:

- | Country
- | Region
- | Local Authority: District / Unitary
- | Local Authority: County / Unitary

2011 Rural-Urban Classification (England and Wales)

This classification allows summary outputs to be produced by rural-urban type at local authority, region and country level (it will not work with other geography types).

The outputs are based on a rural-urban classification of output areas. The 2011 classification is a revised version of the one created after the 2001 Census with additional detail in the urban domain.

Output areas are treated as *urban* if they were allocated to a 2011 built-up area with a population of 10,000 or more people. The urban domain is sub-divided into three broad morphological types based on the predominant settlement component. As with the previous version of the classification, the remaining *rural* output areas are grouped into three broad morphological types based on the predominant settlement component.

The classification also categorises output areas based on context - i.e. whether the wider surrounding area of a given output area is sparsely populated or less sparsely populated.

The classification of output areas and a User Guide which provides further details about the methodology can be downloaded from the [Open ONS Geography Portal](#) under the Download Products tab.

The following Rural Urban are available:

- | Total
- | Urban (total)
- | Urban major conurbation
- | Urban minor conurbation
- | Urban city and town
- | Urban city and town in a sparse setting
- | Rural (total)
- | Rural town and fringe
- | Rural town and fringe in a sparse setting
- | Rural village
- | Rural village in a sparse setting
- | Rural hamlet and isolated dwellings
- | Rural hamlet and isolated dwellings in a sparse setting

Year Last Worked

For people who have previously been employed, the year last worked is the year in which they were last employed.

The following Year Last Worked are available:

- | All categories: Year last worked
- | In employment
- | Not in employment: Total
- | Last worked in 2011
- | Last worked in 2010
- | Last worked in 2009
- | Last worked in 2008
- | Last worked in 2007
- | Last worked in 2006
- | Last worked in 2001 - 2005
- | Last worked before 2001
- | Never worked
