Dataset metadata

This dataset provides 2011 Census estimates that classify the workplace population in England and Wales by occupation. The estimates are as at census day, 27 March 2011.

This information is used by central and local government, researchers and other organisations to understand local labour markets and to develop and monitor policies at local and regional levels. It is used to identify deprived areas, to allocate community and economic development funding, and for housing and transport planning purposes.

Statistical Disclosure Control

In order to protect against disclosure of personal information from the 2011 Census, there has been swapping of records in the Census database between different geographic areas, and so some counts will be affected. In the main, the greatest effects will be at the lowest geographies, since the record swapping is targeted towards those households with unusual characteristics in small areas.

More details on the ONS Census disclosure control strategy may be found on the [Statistical Disclosure Control](#) page on the ONS web site.

Variables

geography

The following types of geography are available:

2011 census workplace zones, 2011 super output areas - middle layer, local enterprise partnerships (as of April 2017), local authorities: district / unitary (prior to April 2015), regions, countries

Occupation
